Package room

Save time, streamline deliveries, and prevent lost or stolen packages with our automated package room solution. Residents will never miss another delivery since couriers can easily access your building and your package room with a single- or recurring-use PIN code or a video call. Plus, residents get automatic notifications when they've received a package.

HOW THE PACKAGE ROOM WORKS:

Couriers deliver to the package room by entering their designated delivery PIN or by making a video call via the intercom mounted at the package room door.

Residents get an automatic email, text, or in-app notification when they've received a delivery.

Residents retrieve packages by using our mobile app, entering their unique PIN code, or scanning their fob at the package room intercom.

**CLICK TO
LEARN
MORE >**

Elevator controls

Add convenience while maintaining your building's security by streamlining elevator access. With our elevator controls, visitors who are granted access via our video intercom — or any other ButterflyMX device — receive temporary access to your key-fobbed elevators, enabling visitors to take the elevator only to the authorized floor.

HOW ELEVATOR CONTROLS WORK:

A guest or delivery carrier requests property access from a tenant via our video intercom.

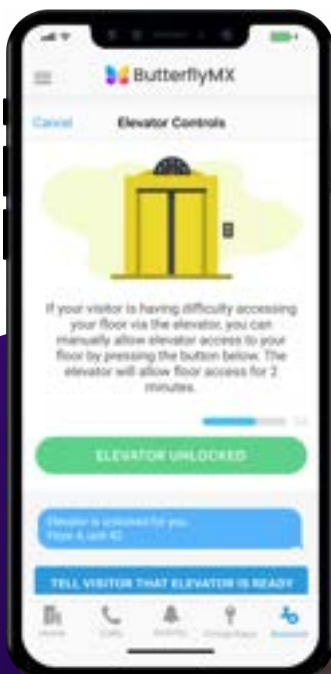

The tenant grants them property access, which automatically unlocks your key-fobbed elevator for a certain amount of time.

The guest enters the elevator and can only access the floor of the tenant they're visiting.

When needed, tenants can temporarily unlock the elevator for their visitors from the ButterflyMX mobile app.

**CLICK TO
LEARN MORE >**

Smart locks

Connect with smart locks models from industry leaders — including Yale, Dormakaba, and Schlage — so residents, staff, and visitors can access entryways, amenity spaces, and apartment units — all from the ButterflyMX mobile app or with access PINs.

Yale

Salto

Dormakaba

Schlage

FEATURES INCLUDE:

Keyless entry and remote access: Unlock your building's doors, gates, or apartment units from one mobile app.

Seamless visitor access: Send friends, family, and guests access PINs that can be revoked at any time.

Self-guided tours: Enable self-guided tours at your property so prospective residents can tour without assistance from staff.

Audit trails: Review a time- and date-stamped log of all entry events.

Remote management: Manage access to all of your building's doors and gates from a powerful online dashboard.

[CLICK TO LEARN MORE >](#)

Self-guided tours

Extend controlled access throughout your building for prospective residents using the ButterflyMX operating system. Our self-guided touring solution is convenient, secure, and seamless.

HOW IT WORKS:

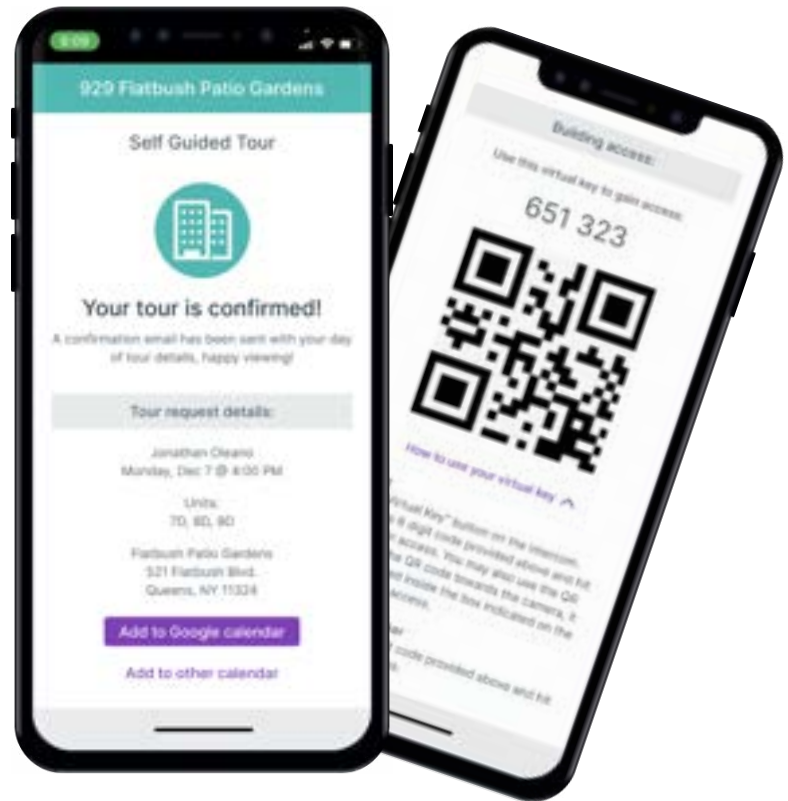

Prospects schedule a building tour on your website.

The prospect's identity is verified.

Prospect receives a temporary virtual key to access your property.

[CLICK TO LEARN MORE >](#)

Front desk station

Easily manage visitor access and resident communication right from your property's front desk — or from anywhere else in the world.

FEATURES INCLUDE:

Live video: View live video feeds of all your property's video intercom systems from a single dashboard.

Remote access: Grant property access via any ButterflyMX-controlled door, gate, or elevator with just a click.

Improved security: Scan and authenticate guest virtual keys and share live videos of visitors directly with residents before granting property access.

Streamlined communication: Speak directly with your visitors through any ButterflyMX video intercom and message residents via our mobile app or standard text messaging.

Powerful mobile app

MORE THAN 20,000
FIVE-STAR REVIEWS

SWIPE TO OPEN

Open a door for yourself or a visitor with just a swipe.

VIDEO CALLING

See a 156° field-of-view video of the person requesting access, before you let them in.

DOOR RELEASE LOGS

Review all door releases with a time- and date-stamped photo from within the app.

VIRTUAL KEYS

Send friends, family, and guests virtual keys that can be revoked at any time.

VOICE CONTROLS

Connect your Alexa- or Siri-enabled device to unlock the door with just your voice.

ELEVATOR CONTROLS

Unlock your key-fobbed elevator right from the mobile app.

[CLICK TO LEARN MORE >](#)

Manage from anywhere

Remotely manage, update, and monitor property access all from one powerful online management dashboard. Elevate your residents' experience without losing control. While our products are resident-focused with features designed to enhance their safety and convenience, property managers can still review property entry logs, issue or restrict access, and connect to other cloud-based systems.

[CLICK TO LEARN MORE >](#)

AUDIT TRAILS

Review all door release events at any time with a date- and time-stamped photo stored for 365 days.

PERMISSIONS

Change residents or couriers permissions for features such as virtual keys and delivery PINs.

INTEGRATIONS

Connect to your property management software for automatic tenant directory updates.

Testimonials

Lower costs

"Talos challenged ButterflyMX to provide a gate access solution that not only had lower costs when compared to other options, but also provided residents with a better living experience."

Jacques Bazinet

Chief Operating Officer
Talos Holdings

Built for modern living

"We've found that ButterflyMX's smart intercom not only has low upfront and ongoing costs but also provides a property access experience built for modern living."

Steve Hallsey

Managing Director
Wood Partners

Loves ButterflyMX

"In fact, Trinity loves ButterflyMX so much it has added it to two other properties and has also added it to the entryway of its corporate headquarters."

Staci Riddle
